

# BRISTOL - BRISTOL SYSTEM

---

## Composition limits

composition 1

composition 2

### Note:

In corner compositions with pouf/elements width 970/1940 Poliform suggests not to use elements depth 1050.

In this case, there is not alignment among elements. (as in drawing 1).

The following combinations are instead suggested:

- corner/central pouf width 970/1940 with backward pouf depth 640 (as in drawing 2);
- corner/central pouf depth 1050 with elements width 1170/1520.

			width 1620	width 2140	width 2540
<b>Sofas</b>					
<b>Corner end unit</b>					
	width 1070	width 1270	width 1520	width 2040	width 2440
<b>End unit</b>					
<b>Corner unit</b>					
	width 970	width 1170	width 1420	width 1940	width 2340
<b>Central unit</b>					
<b>End unit without arm</b>					
	width 1070	width 1270	width 1600		
<b>Chaise longue Freestanding chaise longue</b>					
	width 970	width 1170	width 1500		
<b>"Day bed" chaise longue "Day bed" central chaise longue "Day bed" freestanding chaise longue</b>					
	width 970	width 1170	width 1500		
<b>Central pouf Freestanding pouf</b>					
<b>End pouf Central pouf Freestanding pouf</b>					
<b>Corner pouf</b>					
	width 1400	width 1400			
<b>Angled element as end unit as corner unit</b>					

The lines in the seat of the chaise longue highlight the seams that are in both the fabric and leather versions. Chaise longue with Persia and Tebe fabrics don't have seams, except for elements 1500 - 1600 that have a central seam. The trace in the drawing of the elements 1420 - 1520 - 1620 highlights the seams that are only in the leather version and for the Persia and Tebe fabrics.
