Wooden back panel

- Double-sided units: not finished at the back. It is possible to finish them with fixed panels.
- Millings for inspection possible.

Glass back panel

- Not available for coplanar and sliding units.
- Not available for unit w 377, but it is feasible with surcharge.
- Not available for unit w 1263.
- Customizable in height and width.
- Between 2 glass backs it is not possible to use wooden side: only frame or glass side.
- Double-sided units with glass backs: are already finished at the back.
- The following elements can not be inserted: shelf (☹) - trousers hanger - storage tray.

Base

- Presence of 4 holes diam. mm 6 (with relative hole covering caps) for feet adjustment (max height 20 mm excursion) and hardware adjustment to the sides.
- Flow rate 100 kg/lm: it is possible to have reinforced base (flow rate 300 kg / lm).
- Unit without base: always included between 2 units with base.
- Millings for inspection possible.
- Plinth for wardrobe with doors is in aluminium painted.
- Plinth for walk-in closet is in aluminium painted.

Top

- Presence of 4 holes diam. mm 6 (with relative hole covering caps) for hardware adjustment to the sides.
- Millings for inspection possible (except for coplanar door).

Wooden side

- With doors in melamine finish (Club - Sand - Skin) the lateral side can be in mat or glossy lacquered finish or melamine following the inner structure.
- It can not be used between 2 units with glass back panel.
- Millings for inspection possible.

Frame side

- Can be used with all the leaf doors of the Senzafine system (except for doors Bangkok - Cover / Match Tecnocover grain - Cover / Match fabric with hinge with 155° opening).
- Not available for coplanar and sliding units.
- Can be reduced in height / not in depth.
- Standard shelves positioning at the indicated heights (different heights: need to be specified on the order).
- With frame side, units without base always need to be included between 2 units with base.
- It is not possible to use the following equipment:
 - double pull down hanging bar - pull-out trays for walk-in closet - removable shoe racks for walk-in closet.

Glass side

- Can be used with all the leaf doors of the Senzafine system (except for doors Bangkok - Cover / Match Tecnocover grain - Cover / Match fabric with hinge with 155° opening).
- Not available for coplanar and sliding units.
- Can be reduced in height / not in depth.
- Standard shelves positioning at the indicated heights (different heights: need to be specified on the order).
- With glass side, units without base always need to be included between 2 units with base.
- It is not possible to use the following equipment:
 - double pull down hanging bar - pull-out inner trays for walk-in closet - removable shoe racks for walk-in closet.
- Profiles cannot be installed on glass lateral side.

Order confirmations: abbreviations for sides drilling

- FGH: holes drilling on the full height.
- FG: holes drilling only on the shelf.
- FGIN: holes drilling with inclined shelf
- Fcp64: continuous drilling pitch 64 mm.
- FINC: continuous drilling pitch 64 mm. on the full height for inclined shelves.
- FFS: single hole (hole only on the shelf).
- SF: no hole.
- FFT: standard drilling for frame side.
- X25: special side with profile (max depth mm 1276)
- X25C: special side without profile (max depth mm 1276)
- G+s: side with partial profile

Customizations for structural elements, inner equipment, doors

- See section "Customizations"

Hardware

- See section "Customizations"

Leaf door

- Doors supplied with soft closing hinges.
- Standard hinges with 110° opening (except for doors Bangkok - Cover / Match Tecnocover grain - Cover / Match fabric with opening 92°).
- It is possible use hinges with 165° opening (except for doors Bangkok - Cover / Match Tecnocover grain - Cover / Match fabric with 155° opening to be specified on the order.
- To change the 110° hinge in 165° hinge, apply a surcharge of € 35 for each hinge.
- With 165° hinges it is not possible to insert inner chest of drawers with standard depth into the unit. It is necessary to reduce them in depth (with surcharge).
- With 155° hinges it is not possible to insert inner chest of drawers, it is necessary to reduce them in depth and in width (with surcharge).
- For all types of doors thickness mm 25, combined with Ego - Fitted - Plus glass - Bangkok - Cover Tecnocover grain - Cover fabric - Match Tecnocover grain - Match fabric doors or 25 mm thick doors with Fitted - Phoenix handles, to avoid the doors touching each other while opening, the 110° standard hinge is replaced with a 92° hinge.
- Ego doors with 180° opening.
- Doors Fitted and Plus glass with 98° opening.
- For double-door units (805 - 966 - 1288 - double terminal) right door with handle and left door with dust profile (inversion possible: to be specified on the order).
- For corner units right door with handle and left door with corner pillar (inversion possible: to be specified on the order).
- For corner units it is possible to have handles on both doors, only with built-in Break or Sydney handles.
- It is not possible to open the doors of two adjacent units at the same time.

Sliding door

- Doors supplied with soft opening and closing sliding system.
- Height 2910 not available for w 1263 units.
- With 3 units wardrobe the central door slides to the right (for left sliding: specify on the order).
- The outer door has 2 handles as standard (for only 1 handle: specify on the order).
- Doors for w 1288 units in melamine - lacquer - wooden finish: only Rail handle is available.
- Sliding wardrobe 2 doors, wardrobe minimum width: 1313 mm (2 customized units width 619 mm internal)
- Sliding wardrobe 3 doors, wardrobe minimum width: 2380 mm (3 customized units width 760 mm internal) if door with Rail handle
2332 mm (3 customized units width 744 mm internal) if door with another handle model
- Sliding wardrobe 4 doors, wardrobe minimum width: 2601 mm (4 customized units width 619 mm internal)
- 2 dust-proof brushes are installed on the full height of the back of the door.
- The outer door has an upper closing dust profile.
- For the upper mechanism visibility, reducing wardrobe to a height less than 2270 it is not suggested.

Coplanar door

- Doors supplied with soft opening and closing sliding system.
- Height 2910 not available.
- With 3 units wardrobe the central door slides to the left (door opening direction cannot be changed).
- With 3 units wardrobe, the central door has as standard 1 left handle (for a second handle: specify on the order).
- Coplanar wardrobe can only have doors with the same width.
- Coplanar wardrobe 2 doors, wardrobe minimum width: 1625 mm (2 customized units width 775 mm internal)
- Coplanar wardrobe 3 doors, wardrobe minimum width: 2431 mm (3 units width 777 mm internal)
- Doors can be cut in width.
- With 2 doors wardrobe, both units open completely.
- With 3 doors wardrobe, only the left lateral and the central units open completely. It is not possible to insert pull-out elements (chests of drawers, trousers hanger, tray full width, pull down hanging bar) in the right lateral space, because the door overlaps of 139 mm.
- For technical reasons and for the upper mechanism visibility, reducing wardrobe to a height less than 2270 it is not suggested.
- With wardrobe with 3 doors, the central door has an upper rack without lateral support; opening and closing, the door can swing more than the 2 lateral doors.
- Use of chests of drawers for leaf doors is required.

Notes for order development

Unless otherwise specified:

- central sides: in melamine
- lateral sides: "finished" lacquered or wooden
- wardrobe plinths: ardesia finish
- walk-in closet plinths: ardesia finish
- inner shelves and chest of drawers tops: in melamine
- hanging rails: ardesia
- inner drawers: with Track handle in ardesia
- adjusting filler: flush to the structure
- with lamps: wardrobe with channel + sensor walk-in closet with channel.

Handles

- Handles assembled at height 900 mm (handle hole central height, up to flush bottom to door).
- Handles price is not included in the door price (except for doors Bangkok - Ego with integrated handle, Fitted doors with Fitted handle - Plus glass with Plus handle).
- On leaf doors (except for glass doors, fabric, tecnocover grain and Bangkok) with handle, on request it possible to apply lock handle.

How to calculate the price of wardrobe with melamine sides

A add the prices of each component (system used in the order confirmation) on page 104

B add to the price of the unit structures, the price of the lateral side on page 121

C use composed wardrobes on page 149

Notes: remember to add surcharges for:

- handles
- lateral sides finish
- back panels finish
- frame / glass sides

No inner equipment is included in the price

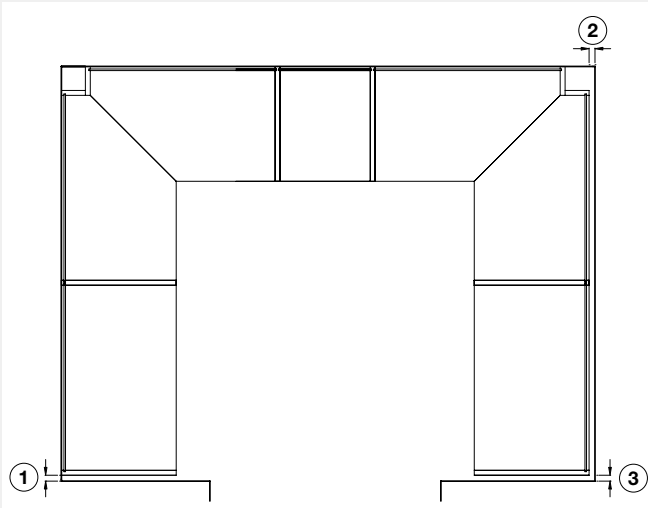

Technical notes

Assembling in height

- An extra space of 15 mm is required for wardrobes with LEAF doors and an extra space of 60 mm for wardrobes with SLIDING/COPLANAR doors.
- When there are SLIDING doors the overall wardrobe height is 20 mm more than what is here specified because of the upper trolley for the outer door.
- With COPLANAR doors the wardrobe overall height is 50 mm more than what is here specified.

Assembling in width

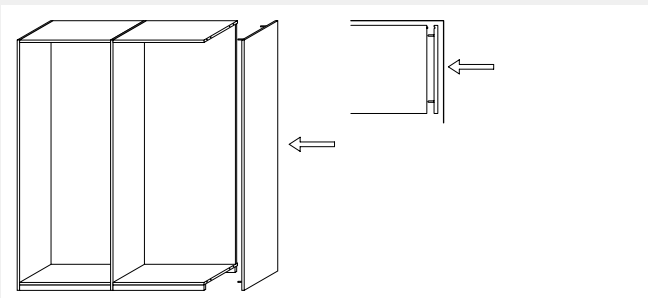

- Lateral space > 40 mm proceed with standard assembling.
- Lateral space > 40 mm require a special "niche" assembling (to specify on the order).

- ① ② ③
from 10 to 40 mm: "niche" special assembling
more than 40 mm: "standard" assembling

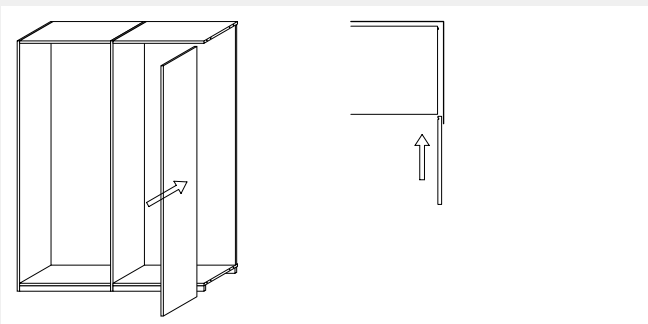

Standard assembling

condition: lateral space greater than 40 mm.

("Niche") Special assembling

condition: lateral space lower than 40 mm.

Assembling instructions

- For wardrobes with structure depth less than 584 mm we suggest to fix them to the wall, in order to avoid any risk of tilting.

Adjustments and levelling

- The levelling of the composition is obtained by adjusting the feet assembled on the bases.

Colour variations

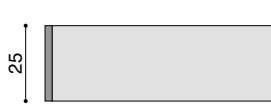

- Elements with wooden finish may undergo colour changes with the time, due to light exposure as well as to the ageing of the wood.
- In case of supplementary orders slight tone differences might be possible, which will anyway soften after some time.
