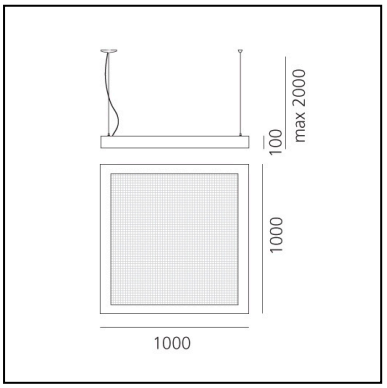
Altrove Suspension LED Direct/Indirect emission - App Compatible

Carlotta de Bevilacqua

IP20



DESCRIPTION

A frame creates a volume of coloured light which interacts with the mirror surface on the bottom and with the incisions on the transparent front surface which extract the light. In a game of re- flections, the space is no longer one, instead becoming multiple or simply other, an illusory perception of reality that takes you to a new place, altrove (literally, elsewhere).
